FOR YOUR HOME — VERTICAL AEROPONIC SYSTEMS

Grow Up. Not Out.

"Fresh food doesn't need a huge backyard."

Grow herbs, greens, microgreens, strawberries and other compact crops in just 0.22 m² of space.
Harvest what you need, when you need it — from your balcony, patio, courtyard or backyard.

Configure Your Home System | Why Grow Food At Home?

CORE MOTIVATIONS

Why Grow Food At Home?

Traditional vegetable gardening requires land, time, and weeding. AeroHarvest turns vertical space into your daily living produce section.

1. Smaller Backyards

"Your balcony counts."

You don't need a quarter-acre backyard to grow fresh food. AeroHarvest turns a compact 60 × 60 cm footprint into a vertical growing tower for balconies, patios, townhouses, and courtyards.

2. Rising Food Costs

"Grow the produce you buy most often."

Stop buying an entire bunch of basil, mint, or salad greens at $4.50 a bunch when you only need a handful for dinner. Grow high-frequency herbs and salad greens at home.

3. Food Waste

"Harvest what you're actually going to eat."

You buy a plastic container of spinach, use a little, and throw the slimy rest away 4 days later. With AeroHarvest, your produce stays alive in the tower until the minute you cook.

4. Peak Freshness

"From plant to plate in minutes."

Supermarket produce travels: Farm → Processing → Cold Freight → Distribution → Store → Fridge →

5. Total Food Control

"Know what you're growing."

Choose your seeds, growing inputs, and harvest timing. You control the water quality and nutrition with

6. Food Resilience

"Put food production back in your hands."

Your supermarket doesn't have to grow everything you eat. Having an

Plate. AeroHarvest is simply: Grow → Harvest → Eat. Peak aroma and crisp texture.

complete peace of mind over what your family consumes.

active vertical tower gives your home direct daily access to nutrient-rich salad greens and herbs.

LIFESTYLE & EXPERIENCE

You Grew This.

PLANT IT. WATCH IT GROW. HARVEST IT. COOK IT. EAT IT.

Gardening is not just technology — it's a sensory daily experience. Imagine snipping fresh Vietnamese mint for a Friday night cocktail, or harvesting crisp oakleaf lettuce minutes before serving Sunday lunch to friends.

- Stunning living architectural feature for your home or balcony
- Clean soilless operation — no dirt under fingernails or muddy pots

- Continuous multi-tier growth for year-round fresh harvests

FAMILY & EDUCATION

Let Them See Where Food Comes From.

In a modern world of supermarket plastic packaging, vertical gardening gives children a front-row seat to biological science and nature's cycle right inside the home.

SEED → PLANT → ROOTS → GROWTH → HARVEST → FOOD

- Interactive biology lesson
- Hands-on responsibility
- Encourages eating greens
- Meaningful family activity

PRODUCT VISUALIZER

5-Section Compact Tower — 20 Grow Sites (1.25 m)

Food-grade polymer modular sections, 38L sage green reservoir, low-voltage DC pump, and 60 × 60 cm compact footprint.

STEP 1: SELECT TOWER HEIGHT & CAPACITY

5-Section Compact Tower

MOST POPULAR

7-Section Standard Tower

11-Section Family Powerhouse

Ideal for small balconies, inner-city apartments & singles/couples

Growing Sites:	**20 Sites**
Tower Height:	**1.25 m**
Footprint:	**60 × 60 cm (0.22 m²)**

$299 AUD (GST Inc.)

Our most versatile tower for everyday fresh herbs & salad greens

Growing Sites:	**28 Sites**
Tower Height:	**1.52 m**
Footprint:	**60 × 60 cm (0.22 m²)**

$349 AUD (GST Inc.)

Maximum vertical productivity for high-yield family harvesting

Growing Sites:	**44 Sites**
Tower Height:	**2.1 m**
Footprint:	**60 × 60 cm (0.22 m²)**

$449 AUD (GST Inc.)

STEP 2: CHOOSE PACKAGE INCLUSION LEVEL

Standard Base Tower — $299 AUD

Includes modular tower sections, 38L reservoir base, and submerged low-voltage DC water circulation pump.

- ✓ Modular vertical tower (20 sites)
- ✓ 38L heavy-duty water reservoir
- ✓ Low-voltage DC circulation pump & automated timer

RECOMMENDED FOR NEW GROWERS (+$100 AUD)

Complete Growing Kit — $399 AUD

Everything in Standard Base PLUS organic-compatible nutrient concentrates, propagation dome, seedling plugs, and pH testing kit.

- ✓ Standard Base Tower + 38L Reservoir & DC Pump
- ✓ Organic-compatible A+B liquid nutrient concentrate formulation
- ✓ Rockwool/coco seedling plugs + propagation tray & humidity dome
- ✓ Precision pH testing liquid kit & buffer solution

STEP 3: OPTIONAL SYSTEM ACCESSORIES

☐ **Full-Spectrum 24V DC LED Grow Light System** **+$149 AUD**

Energy-efficient LED bars engineered for indoor growing in low-light apartments & shaded patios.

☐ **Heavy-Duty Vertical Trellis & Plant Support** **+$49 AUD**

Stabilises climbing crops like strawberries, vine tomatoes & heavy herb branches.

YOUR CUSTOMIZED HOME SYSTEM

5-Section Compact Tower (Base)

20 grow sites • 1.25 m tall • Australia-wide dispatch

TOTAL INVESTMENT

Order Home System

MATERIAL & HARDWARE INTEGRITY

Engineered For Lifelong Home Growing

No flimsy plastic pots or dangerous wiring. AeroHarvest hardware is built with food-grade UV-stabilized polymer materials designed for Australian weather conditions.

Food-Grade Polymer

Constructed with BPA-free, non-toxic food-grade polymer housing that will not leach chemicals under Australian sun.

Closed-Loop Circulation

38-Litre heavy-duty reservoir continuously recirculates water mist straight to suspended roots without waste.

Low-Voltage DC Pump

Safe 12V/24V DC submerged pump with automated digital timer. Uses less electricity than a standard LED light bulb.

Modular Interlocking

Tool-free stackable modular sections. Add or remove tiers easily as your household crop requirements expand.

INSPIRATIONAL SCIENCE STORY

From Space Research To Your Backyard.

NASA and international research partners have spent decades investigating soilless aeroponic and hydroponic growing systems for space agriculture. The reason is simple: when astronauts are aboard the International Space Station or deep space missions, they face severe constraints — **limited space, limited water, and no soil.**

AeroHarvest does not claim to be space station hardware. But the core engineering principle is identical: by misting nutrient-rich water directly onto plant roots suspended in air, aeroponics maximizes oxygen delivery and crop density while drastically reducing footprint.

> "If we can investigate growing fresh food in space, imagine what we can harvest on an Australian balcony."

HOUSEHOLD SAVINGS CALCULATOR

Calculate Your Home Grocery Payback

See how much your household can save by replacing expensive store-bought herb bunches and packaged salad greens with living home harvests.

1. How much do you spend on herbs, leafy greens & produce each week?

<$20 | $20–$40 | $40–$60 | $60–$100 | $100+

2. How many people are you growing for?

ILLUSTRATIVE ESTIMATED METRICS

Estimated Annual Produce Grocery Spend

$1,560 AUD / yr

1 Person | 2 People | 3–4 People | 5+ People

3. Which crops would you grow at home? (Multi-select)

- [x] Herbs
- [x] Leafy greens
- [ ] Microgreens
- [ ] Strawberries
- [ ] Edible flowers
- [ ] Other compact crops

Estimated Potential Home Harvest Replacement

$796 AUD / yr

Replaces ~51% of store-bought specialty greens & herbs

Estimated Payback Period: **~5.3 Months**

Disclaimer: Savings calculations are illustrative estimates based on typical Australian household grocery spend patterns and proper plant care. Actual savings vary based on crop selection, harvesting habits, and regional pricing.
